

Name: _____

Date: _____

Jay sat down at lunch and unzipped his backpack. His lunch bag was not inside. His stomach growled, and the cafeteria line was already closed, so he could not buy food. He checked every pocket and still found nothing. The morning had been rushed, and the bag was still on the kitchen counter.

His friend Elena opened her lunch and split the sandwich and the apple slices with him. Jay ate slowly and said thank you. At recess he did not forget. He helped Elena carry the heavy ball bag all the way out to the field. Elena said friends share, and she meant it.

The next morning Jay packed his own lunch at the counter. He put an extra cheese stick on top for Elena. He zipped the backpack and checked the pocket before he left home. Elena smiled at lunch when she saw the snack in her hand. Jay told her the cheese stick was a thank-you for yesterday.

Fill in the circle next to the best answer.

1. What is Jay's problem at lunch?

- ☐ A. Elena forgets the ball bag in the gym.
- ☐ B. His lunch bag is not in his backpack.
- ☐ C. His cheese stick melts on the counter at home.
- ☐ D. The cafeteria line runs out of apples.

2. How does Elena help Jay?

- ☐ A. She buys him a lunch from the closed line.
- ☐ B. She shares her sandwich and apple slices.
- ☐ C. She carries his backpack home after school.
- ☐ D. She packs his lunch for him the night before.

3. How does Jay thank Elena?

- ☐ A. He brings her an extra cheese stick the next day.
- ☐ B. He shares his missing lunch with her at recess.
- ☐ C. He asks her to stop helping him.
- ☐ D. He gives her the ball bag to keep.

Name: _____ Date: _____

Nina was the helper for Pepper the guinea pig. She thought she had latched the cage, but at reading time a student whispered that Pepper was gone. Nina shut the classroom door so Pepper could not slip into the hall. A guinea pig is small, and the hall is full of feet.

She looked under the reading rug and behind the paint jars. At last she found Pepper on the art shelf, sitting in a box of paper scraps. Nina lifted her gently and set her back in the cage. This time Nina checked the latch twice and tugged it to be sure.

Pepper nibbled her hay as if nothing had happened. Nina told the teacher, and they added a second clip to the cage door. Nina wrote a note on the job chart: Check the latch. She read the note out loud so the next helper would see it.

Fill in the circle next to the best answer.

1. What is Nina's problem?

- ☐ A. The class ran out of paper scraps.
- ☐ B. Pepper got out of the cage.
- ☐ C. The hallway door will not shut.
- ☐ D. Pepper will not eat her hay.

2. Where does Nina find Pepper?

- ☐ A. In the hall outside the classroom
- ☐ B. In a box of paper scraps on the art shelf
- ☐ C. Behind the paint jars in the closet
- ☐ D. Under the reading rug by the door

3. What keeps Pepper from getting out again?

- ☐ A. Nina leaves the cage door open for the rest of the day.
- ☐ B. Pepper stays in the box of scraps.
- ☐ C. They add a second clip, and Nina checks the latch.
- ☐ D. The class moves Pepper into the hall.

Name: _____

Date: _____

Leo was practicing shots in the gym when his kick sent the ball into a chair leg. The ball popped and hissed. Leo froze. He knew the class needed that ball for games after lunch, and he did not want to hide what he had done. Hiding a flat ball would only make the problem bigger.

Leo picked up the flat ball and walked it to Coach Ramirez. He told the truth and said he was sorry. Coach handed him tape, and Leo pressed it over the hole so the class could still roll the ball. It was not perfect, but it worked for the game. The class could still play, and Leo felt better for telling the truth.

After school, Coach brought a new ball from the office. Leo thanked him and promised to aim away from the chairs. The next shot stayed on the gym floor, far from the chair legs.

Fill in the circle next to the best answer.

1. What goes wrong in the gym?

- ☐ A. Coach Ramirez locks the gym doors.
- ☐ B. The new ball rolls out of the office.
- ☐ C. Leo pops the class ball on a chair leg.
- ☐ D. Leo forgets how to kick.

2. What does Leo do after the ball pops?

- ☐ A. He tells Coach Ramirez the truth.
- ☐ B. He blames a chair for moving.
- ☐ C. He leaves the gym before anyone sees.
- ☐ D. He hides the ball in his backpack.

3. How is the problem finally solved?

- ☐ A. The popped ball fills with air by itself.
- ☐ B. Leo tapes the hole, and Coach brings a new ball.
- ☐ C. Leo aims the flat ball at the chairs again.
- ☐ D. The class cancels games for the week.

Name: _____

Date: _____

Omar was the king in the class play. Five minutes before the show, the paper crown was not on the prop table. He checked the costume bin and the music stand. No crown. His hands felt shaky, and the curtain was about to open. Without a crown, he would not look like the king.

His partner, Lila, grabbed yellow paper and tape. They cut a band, taped it to fit Omar's head, and drew three paper jewels. It was simple, but it looked bright. Omar tried it on and nodded. There was just enough time to walk to the side of the stage.

Omar walked on stage wearing the new crown. He remembered his lines, and the class clapped. After the play he saved the crown in his folder. He showed it to his family at home that night and told them how Lila had helped.

Fill in the circle next to the best answer.

1. What is missing before the play?

- ☐ A. Lila's costume from the music stand
- ☐ B. Omar's lines for the last scene
- ☐ C. The paper crown for the king
- ☐ D. The tape from the art room

2. What do Omar and Lila make?

- ☐ A. A curtain that opens by itself
- ☐ B. A music stand out of yellow paper
- ☐ C. A new crown from paper, tape, and drawn jewels
- ☐ D. A new script with different lines for the king

3. How does the story end?

- ☐ A. Omar wears the new crown and remembers his lines.
- ☐ B. They find the old crown under the curtain.
- ☐ C. The class cancels the play.
- ☐ D. Lila wears the crown instead of Omar.

Name: _____

Date: _____

Diego and his uncle spread a blanket in the park and set out watermelon, rolls, and cheese. A line of ants crossed the blanket and headed for the watermelon. Diego waved his hands, but more ants came. The picnic was about to be theirs, and waving only made the ants scatter and come back.

Uncle said they should move, not fight the ants. They packed the food into closed tubs, shook the blanket, and carried everything to a picnic table in the sun. Diego wiped the table with a napkin before they set the tubs down. The table was in the sun, away from the ant trail.

They ate at the table, and the ants stayed in the grass. Diego kept the tubs shut between bites. His uncle said the table had been the better spot all along, and Diego agreed as he shut the last tub.

Fill in the circle next to the best answer.

1. What is the problem at the picnic?

- ☐ A. The picnic table is already full of people.
- ☐ B. Diego cannot find the closed tubs.
- ☐ C. Uncle forgets to bring the watermelon.
- ☐ D. Ants crawl onto the blanket toward the food.

2. Why does waving his hands not work?

- ☐ A. Uncle tells him to feed the ants.
- ☐ B. The ants move the picnic table.
- ☐ C. More ants keep coming onto the blanket.
- ☐ D. The napkin blows into the pond.

3. What solves the problem?

- ☐ A. Diego waves until every ant leaves the park.
- ☐ B. They move the food in closed tubs to a table.
- ☐ C. They shake the ants into the cheese tub.
- ☐ D. They eat the watermelon in the grass with the ants.

Name: _____ Date: _____

Rosa was riding home when her bike chain slipped off the front gears. The pedals spun, but the bike would not move. She walked it to the sidewalk so cars could pass. Grease striped her hand, and she was still blocks from home. Walking the whole way would make her late.

Her neighbor, Mr. Brooks, was washing his car. He showed Rosa how to lift the chain with a stick and set it on the small gear. Rosa tried once and missed. She tried again, slowly, and the chain caught on the teeth of the gear.

She pedaled down the driveway and back. The chain stayed on. Rosa thanked Mr. Brooks and rode the rest of the way home. She checked the chain once more at the corner before she turned onto her street.

Fill in the circle next to the best answer.

1. What happens to Rosa's bike?

- ☐ A. Mr. Brooks borrows it to wash his car.
- ☐ B. The chain slips off and the bike will not move.
- ☐ C. The front tire goes flat on the sidewalk.
- ☐ D. The pedals fall off in the driveway.

2. What does Rosa do on her first try?

- ☐ A. She fixes the chain on the first try.
- ☐ B. She rides home without any chain at all.
- ☐ C. She lifts the bike into Mr. Brooks's car.
- ☐ D. She misses when she tries to set the chain.

3. How does the story end?

- ☐ A. Mr. Brooks walks the bike home for her.
- ☐ B. The chain stays on, and Rosa rides home.
- ☐ C. The chain slips off again at the corner.
- ☐ D. Rosa leaves the bike on the sidewalk.

Name: _____

Date: _____

The classroom fish tank looked like fog. Ben could barely see the three fish. He noticed extra flakes floating on top, left from a feeding he had done at lunch. Someone else had fed them too. The water had turned cloudy by the afternoon, and the fish hung near the top.

Ben told Ms. Patel. She said too much food can make the water cloudy. Ben scooped out the extra flakes with a net. Then Ms. Patel helped him replace some of the water with fresh water from a bucket. They worked slowly so the fish would not be bumped or frightened.

The next morning the tank was clearer, and the fish swam near the glass. Ben taped a feeding chart on the tank so no one would feed them twice. He checked the chart before he opened the food the next day too.

Fill in the circle next to the best answer.

1. Why is the tank cloudy?

- ☐ A. The glass is covered with paint.
- ☐ B. The feeding chart fell into the water.
- ☐ C. Ms. Patel turned off the lights.
- ☐ D. The fish got too much food.

2. What does Ben do with the extra flakes?

- ☐ A. He leaves them floating on top.
- ☐ B. He scoops them out with a net.
- ☐ C. He pours them back into the food jar.
- ☐ D. He feeds them to the fish again.

3. How do they stop a second feeding?

- ☐ A. Ben feeds the fish three times a day.
- ☐ B. Ben tapes a feeding chart on the tank.
- ☐ C. They take the fish out of the classroom.
- ☐ D. Ms. Patel throws the food away.

Name: _____

Date: _____

Priya could not read the board. Her glasses were gone. She checked her desk, the library bin, and the gym office. She was starting to worry she would miss the spelling test. The words on the board were only soft shapes, and the test was after recess.

At recess she pulled on her hoodie because of the wind. Something hard tapped her elbow. She reached into the front pocket and felt the case. The glasses were inside, folded and safe. She must have tucked them there before lunch and forgotten in the rush.

Priya put them on, and the trees looked sharp again. She went back to class, told her teacher, and finished the test. From then on she clipped the case to her backpack so she would not have to hunt for it again before a test. She checked the clip every morning before she left home.

Fill in the circle next to the best answer.

1. What is Priya's problem?

- ☐ A. Her hoodie is in the gym office.
- ☐ B. The spelling test is canceled.
- ☐ C. The library bin is full of books.
- ☐ D. She cannot find her glasses before a test.

2. Where are the glasses?

- ☐ A. On the teacher's desk
- ☐ B. In the library bin
- ☐ C. At home on the kitchen table
- ☐ D. In the front pocket of her hoodie

3. What does Priya do so she will not lose them again?

- ☐ A. She hides the case in her hoodie pocket.
- ☐ B. She leaves the glasses in the gym office.
- ☐ C. She clips the case to her backpack.
- ☐ D. She stops wearing them at school.

Name: _____ Date: _____

Andre spent all of art class on a painting of the playground. As he carried the wet paper to the drying rack, his sleeve dragged across the sky. A gray smear covered the sun. He wanted to crumple the paper and start over.

Ms. Brooks said to wait until it dried and then decide. When the paper was dry, Andre looked again. The smear could be a cloud instead of a mistake. He painted soft edges around it and added two smaller clouds. He did not try to scrub the gray away.

The playground looked stormy and interesting. Andre hung the painting in the hall with his name on a card. Classmates stopped to look at the sky. Andre was glad he had waited instead of throwing the picture away.

Fill in the circle next to the best answer.

1. What happens to Andre's painting?

- ☐ A. The paper blows out the art-room window.
- ☐ B. The drying rack falls off the wall.
- ☐ C. Ms. Brooks paints over the playground.
- ☐ D. His sleeve smears gray paint across the sun.

2. What does Ms. Brooks tell Andre to do?

- ☐ A. Scrub the gray smear off with water.
- ☐ B. Wait until the paper dries before he decides.
- ☐ C. Hang the wet paper in the hall at once.
- ☐ D. Throw the painting away and start a new one.

3. How does Andre solve the problem?

- ☐ A. He asks a friend to paint a new sun.
- ☐ B. He hides the painting in his folder.
- ☐ C. He cuts the sky off the paper.
- ☐ D. He turns the smear into a storm cloud.

Name: _____ Date: _____

Sofia's class was going to the science museum, but her permission slip was missing on the day it was due. She dumped her folder on the kitchen table. Old drawings fell out. The slip was not among them, and the trip list closed in the morning.

She and her dad checked the backpack pockets and the mail pile. Then Dad opened the kitchen drawer where they kept pencils. The slip was under a pad of paper, still blank. Sofia let out a long breath.

Dad signed it before dinner. Sofia put it in a folder and zipped that folder into the front pocket. The next morning she handed it to her teacher and got her name on the trip list. She grinned all the way to her desk.

Fill in the circle next to the best answer.

1. What is Sofia missing?

- ☐ A. The permission slip for the museum trip
- ☐ B. The teacher's copy of the trip list
- ☐ C. Her drawings of the science museum
- ☐ D. Dad's pencil from the kitchen drawer

2. Where do they find the slip?

- ☐ A. Inside the folder of old drawings
- ☐ B. Under a pad of paper in the kitchen drawer
- ☐ C. On the mail pile by the door
- ☐ D. In the front pocket of her backpack

3. How does Sofia get on the trip list?

- ☐ A. She draws a new slip during class.
- ☐ B. Dad drives her to the museum alone.
- ☐ C. The teacher says she does not need a slip.
- ☐ D. Dad signs the slip, and she turns it in.

Name: _____

Date: _____

Noah was new, and he sat alone on the bench at recess. Camila's team needed another player for kickball. She walked over and asked if he wanted to play. Noah looked at the field and shook his head a little.

He said he did not know the rules. Camila explained them in three short steps: kick, run, and tag the base. She let him watch one kicker first so he could see how it worked. Then she saved him the next turn.

Noah kicked a soft ground ball and reached first base. His team cheered. The next day he came to the bench smiling, and Camila saved him a spot in the line. Noah said the game was the best part of his day, and Camila saved the spot again.

Fill in the circle next to the best answer.

1. What is the problem at recess?

- ☐ A. Camila's team has too many players.
- ☐ B. Noah is new and sitting alone.
- ☐ C. Noah already knows every rule.
- ☐ D. The kickball is stuck on the roof.

2. How does Camila help Noah learn the game?

- ☐ A. She changes the rules so nobody runs.
- ☐ B. She tells him to sit out the whole game.
- ☐ C. She explains kick, run, and tag the base.
- ☐ D. She asks him to be the referee.

3. How does the story end?

- ☐ A. Noah leaves the field before he ever gets to kick.
- ☐ B. The game is canceled after one kick.
- ☐ C. Noah plays, and Camila saves him a spot the next day.
- ☐ D. Camila's team will not let him try.

Name: _____ Date: _____

Hector was in charge of the cookie sale. He counted the boxes on the table and came up two short. People were waiting in line, and he did not want to sell a box he could not hand over. His list and the table did not match.

He checked the supply closet and the teacher's desk. Then he looked behind the counter. Two boxes had slid against the wall, hidden by a poster board. Hector pulled them out and brushed off a curl of dust.

He set them on the table and counted again. The number matched his list. He sold the cookies, wrote the total, and pushed the extra boxes forward so none could hide. The line moved, and no one left without a box. Hector counted once more before he closed the table.

Fill in the circle next to the best answer.

1. What problem does Hector have?

- ☐ A. The poster board will not stand up.
- ☐ B. The supply closet is locked for the day.
- ☐ C. He is two cookie boxes short of his count.
- ☐ D. People in line do not want cookies.

2. Where are the missing boxes?

- ☐ A. Behind the counter, hidden by a poster board
- ☐ B. Already sold to the first people in line
- ☐ C. On the teacher's desk under a folder
- ☐ D. In the supply closet on the top shelf

3. What does Hector do after the count matches?

- ☐ A. He sells the cookies and moves the extra boxes forward.
- ☐ B. He closes the sale and sends the line away.
- ☐ C. He changes the list so it stays short.
- ☐ D. He hides the two boxes behind the counter again.

Name: _____ Date: _____

Amina's dog, Bean, ran and hid whenever the vacuum started. On Saturday Amina needed to clean her room, but Bean was shaking behind the bed. She could not reach the rug with him pressed into the corner.

Amina turned the vacuum off. She let Bean sniff the silent machine and gave him a calm pat. Then she turned it on in the hall, far from him, and tossed his ball so he had something else to notice. The noise was still there, but it was not right beside him.

Bean stayed in the doorway instead of running. Amina vacuumed a small square of rug and stopped. The next Saturday Bean watched from his bed. He still disliked the noise, but he did not hide.

Fill in the circle next to the best answer.

1. What is the problem on Saturday?

- ☐ A. The vacuum will not turn off.
- ☐ B. Bean's ball is lost somewhere in the hall.
- ☐ C. Bean hides and shakes when the vacuum is on.
- ☐ D. Amina's room is already clean.

2. What does Amina do before she turns the vacuum on again?

- ☐ A. She lets Bean sniff the silent machine.
- ☐ B. She hides the vacuum in the closet for good.
- ☐ C. She vacuums under the bed right away.
- ☐ D. She shuts Bean in the hall alone.

3. How does the story end?

- ☐ A. Amina gives up and leaves the rug dirty.
- ☐ B. Bean runs outside and will not come back.
- ☐ C. The vacuum stays on all night.
- ☐ D. Bean watches from his bed and does not hide.

Name: _____ Date: _____

Lila's group had finished a poster about the water cycle. On the morning of the presentation, she found a rip through the sentence about clouds. The corner had caught on a chair. If they presented it that way, the class would not be able to read the line.

Lila did not try to hide the rip. She turned the poster over, and her partners held it flat while she pressed tape along the back. Then she wrote the torn sentence again in neat letters above the tape. She checked that every word could still be read.

When they presented, the poster stayed together. The class could read every word. Lila kept a roll of tape in the project box after that. The group felt ready, and the rip did not stop the talk.

Fill in the circle next to the best answer.

1. What is wrong with the poster?

- ☐ A. The presentation was moved to another week.
- ☐ B. A rip goes through the sentence about clouds.
- ☐ C. The group never finished the water cycle.
- ☐ D. The tape covers the title of the poster.

2. What does Lila do instead of hiding the rip?

- ☐ A. She asks to skip the presentation.
- ☐ B. She shows her partners and they tape the back.
- ☐ C. She colors over the rip with a marker.
- ☐ D. She cuts the clouds sentence off the poster.

3. How does the presentation go?

- ☐ A. They hide the poster behind the chair.
- ☐ B. The group presents a blank poster.
- ☐ C. The rip opens again in the middle of the talk.
- ☐ D. The poster stays together and the class can read it.

Name: _____

Date: _____

Malik was stacking paper cups for the class party when his elbow bumped the table. The tower tipped and cups rolled across the floor. Some were crushed. The party started in ten minutes, and the drink table had no stack left.

Malik and his partner, Noor, picked up every cup that was still round. They set aside the crushed ones for the recycling bin. Then they built a shorter stack with a wide bottom so it would not tip if someone bumped the table again.

The stack stayed up while students poured juice. Malik stood the crushed cups in the bin and wiped a drip off the table. Noor gave him a thumbs-up. A short stack was enough for the party, and it did not fall when students reached for cups.

Fill in the circle next to the best answer.

1. What happens to Malik's cup tower?

- ☐ A. Noor knocks it over on purpose.
- ☐ B. The party is canceled before they start.
- ☐ C. The juice spills before the cups are stacked.
- ☐ D. His elbow bumps it and the cups roll off.

2. What do they do with the crushed cups?

- ☐ A. They use them for the juice anyway.
- ☐ B. They stack the crushed cups on top.
- ☐ C. They hide them under the drink table.
- ☐ D. They set them aside for the recycling bin.

3. Why does the new stack stay up?

- ☐ A. It is shorter and has a wide bottom.
- ☐ B. Noor glues the cups together.
- ☐ C. Malik holds it during the whole party.
- ☐ D. They build it on the floor in the hall.

Name: _____ Date: _____

Music class was about to start, and Noor's recorder was not in her backpack. She remembered leaving it on the piano at home after she practiced. Without it, she could not play her part with the group.

She told Mr. Ellis before the warm-up. He lent her a spare recorder from the cabinet and showed her which end to hold. Noor wiped the mouthpiece, found her place in the music, and played softly so she could hear the others. Her notes matched the group by the second song.

After class she washed the spare the way Mr. Ellis had shown her and put it back. That night she clipped her own recorder to her folder. The next morning it was in the backpack, ready for music.

Fill in the circle next to the best answer.

1. What is Noor's problem?

- ☐ A. She left her recorder at home.
- ☐ B. She does not know the second song.
- ☐ C. Mr. Ellis canceled music class.
- ☐ D. The spare recorder is broken.

2. How does Noor play with the group?

- ☐ A. She hums her part from the back row.
- ☐ B. She goes home to get her own recorder.
- ☐ C. She shares a friend's recorder at the same time.
- ☐ D. She borrows a spare recorder from Mr. Ellis.

3. What does Noor do so it will not happen again?

- ☐ A. She leaves the spare in her backpack.
- ☐ B. She clips her recorder to her folder.
- ☐ C. She stops practicing at the piano.
- ☐ D. She skips music the next morning.

Name: _____

Date: _____

Owen was taking his bean plant home for the weekend when he left it in the hot car. By the time he remembered, the leaves had gone limp. The soil was warm, and the stem bent over the pot. He was afraid the plant was done for.

Dad said not to flood it. They carried the pot into the shade on the porch. Owen gave the soil a small drink at the roots and misted the leaves with a spray bottle. Then he waited instead of poking the stem every minute.

By evening the leaves had lifted. Owen brought the plant inside, away from the sunny window, until morning. He wrote a note on the pot: Do not leave me in a hot car. The plant was droopy, but it was not lost. Owen checked the leaves again before bed.

Fill in the circle next to the best answer.

1. What happens to Owen's bean plant?

- ☐ A. Dad throws it out before the weekend.
- ☐ B. It wilts after he leaves it in a hot car.
- ☐ C. The leaves grow too big for the pot.
- ☐ D. The pot breaks on the porch step.

2. What do Owen and Dad do first?

- ☐ A. They cut off every limp leaf.
- ☐ B. They put the plant back in the hot car.
- ☐ C. They move the pot into the shade.
- ☐ D. They flood the pot with a full bucket.

3. How does Owen try to keep the problem from happening again?

- ☐ A. He leaves it in the car overnight.
- ☐ B. He hides the pot under the porch.
- ☐ C. He writes a warning note on the pot.
- ☐ D. He stops watering the plant for good.

Name: _____ Date: _____

Jade's math group was building a pattern with shape cards. The last card, a red triangle, was not in the envelope. Without it, the pattern on the rug stopped too soon. The group looked at one another and then at the empty envelope.

They checked the rug, the supply bin, and Jade's folder. No triangle. Jade opened the math book to the same pattern. The picture showed a red triangle in that spot. She cut a triangle from red paper and labeled it so it would not get lost in the scraps.

The pattern was complete. The group read it aloud to Ms. Patel, and she said the paper shape worked because it followed the book. Jade slid the paper triangle into the envelope with the other cards.

Fill in the circle next to the best answer.

1. What is missing from the math pattern?

- ☐ A. The math book
- ☐ B. Ms. Patel's answer key
- ☐ C. A blue square from the rug
- ☐ D. The red triangle card

2. Where does Jade look before she opens the book?

- ☐ A. In the lunchroom and on the bus
- ☐ B. On the rug, in the supply bin, and in her folder
- ☐ C. In the envelope, where the triangle still is
- ☐ D. Under Ms. Patel's desk only

3. How does the group finish the pattern?

- ☐ A. Jade cuts a red paper triangle to match the book.
- ☐ B. Ms. Patel gives them a different pattern.
- ☐ C. They skip the last shape and stop.
- ☐ D. They color a square and call it a triangle.

Name: _____ Date: _____

Luis set his water bottle on his desk, and the cap was loose. Water crawled across his spelling list until the words blurred. The test was after lunch. He could not study a page he could not read, and he did not want to guess every word.

He told Ms. Ortiz right away instead of hiding the wet paper. She said accidents happen and gave him a dry list. Luis copied each word in his best printing. He said them quietly as he wrote so the spellings would stick.

He let the wet page dry on the windowsill and kept the new list in a folder, away from the bottle. At test time the words came back. Luis capped the bottle tightly before he set it down again, far from the paper.

Fill in the circle next to the best answer.

1. What happens to Luis's spelling list?

- ☐ A. Water from his bottle blurs the words.
- ☐ B. He finishes the test before he studies.
- ☐ C. The folder gets left on the bus.
- ☐ D. Ms. Ortiz loses it before lunch.

2. What does Luis do when he sees the wet page?

- ☐ A. He throws the list away and skips studying.
- ☐ B. He pours more water on it to smooth it.
- ☐ C. He tells Ms. Ortiz instead of hiding it.
- ☐ D. He tries to take the test on the wet paper.

3. How is Luis ready for the test?

- ☐ A. He memorizes the blurred page.
- ☐ B. He copies a dry list and studies the words.
- ☐ C. Ms. Ortiz cancels the spelling test.
- ☐ D. He leaves the new list next to the bottle.

Name: _____ Date: _____

Mina was running to the kickball line when her shoelace snapped. The shoe flapped, and she had to stop before she tripped. Recess was short, and she did not want to sit it out. A knot in the broken lace would not hold.

Her friend showed her the lost-and-found bin, where the office kept spare laces. Mina found a white one close to the right length. The secretary helped her pull out the broken piece and thread the new lace through the holes. Mina tied a bow and tugged it.

The shoe stayed on. Mina ran back and got into the game before it ended. After school she put the broken lace in the trash so it would not tangle in her backpack. The new bow held all the way home.

Fill in the circle next to the best answer.

1. What is Mina's problem at recess?

- ☐ A. The kickball game is already over.
- ☐ B. Her shoelace snaps and the shoe flaps.
- ☐ C. Her friend takes the spare lace.
- ☐ D. The secretary will not open the office.

2. Where does Mina get a new lace?

- ☐ A. From a store on the way to school
- ☐ B. From the broken piece she ties back on
- ☐ C. From the kickball bin on the field
- ☐ D. From the lost-and-found bin in the office

3. How does the story end?

- ☐ A. The new lace stays tied and Mina joins the game.
- ☐ B. The bow comes undone on her first step.
- ☐ C. She plays the game in her socks.
- ☐ D. Mina sits out recess with one shoe off.

Name: _____

Date: _____

Theo's locker would not open, and the bell was about to ring. He turned the dial to the numbers on his card, but the lock stayed shut. Students streamed past him. His science folder was inside, and class was down the hall.

He stopped spinning and looked at the card again. The numbers were right, but he was reading them from the bottom because the card was upside down. He turned it over. The first number was 12, not 21. He cleared the lock and tried the three numbers in order, slowly.

The lock popped. Theo grabbed the folder and shut the door. He taped the card right-side up inside his folder that night. The next morning the locker opened on the first try.

Fill in the circle next to the best answer.

1. What is Theo's problem?

- ☐ A. The lock is missing from the door.
- ☐ B. The bell does not ring.
- ☐ C. His locker will not open before class.
- ☐ D. His science folder is already in class.

2. Why do the first numbers fail?

- ☐ A. He is reading the card upside down.
- ☐ B. The folder is too thick for the locker.
- ☐ C. The lock is broken and will never open.
- ☐ D. A friend changed the combination.

3. How does Theo keep from mixing up the numbers again?

- ☐ A. He asks a friend to open it every day.
- ☐ B. He writes the numbers on the hallway floor.
- ☐ C. He stops using the locker.
- ☐ D. He tapes the card right-side up in his folder.

Date: _____

Hana's class was caring for a butterfly in a cup of leaves. Someone bumped the table, and the cup tipped. The butterfly fluttered to the floor, and the leaves scattered. Students gasped and stepped back so they would not step on it.

Hana slid a paper under the butterfly the way the teacher had shown them, slowly, without pinching the wings. Mr. Cole set the cup upright and added fresh leaves. Hana tipped the paper so the butterfly could crawl back onto a leaf. It clung there and folded its wings.

They set the cup in the middle of the table, away from the edge, and taped a card that said Please do not bump. The butterfly stayed on the leaf. Hana checked the cup once more before she sat down.

Fill in the circle next to the best answer.

1. What goes wrong with the class butterfly?

- ☐ A. The cup tips and the butterfly lands on the floor.
- ☐ B. Hana forgets to bring the paper.
- ☐ C. The leaves are too big to fit inside the cup.
- ☐ D. Mr. Cole takes the butterfly home.

2. How does Hana pick the butterfly up?

- ☐ A. She blows it back into the cup.
- ☐ B. She leaves the butterfly on the floor until lunch.
- ☐ C. She grabs the wings with her fingers.
- ☐ D. She slides a paper under it without pinching the wings.

3. What do they do so the cup will not tip again?

- ☐ A. They take the leaves out of the cup.
- ☐ B. They put the cup on the floor.
- ☐ C. They let students bump the table to test it.
- ☐ D. They move it away from the edge and post a sign.

Name: _____ Date: _____

Cole's model volcano was supposed to erupt at the science fair, but the night before, a test run leaked. Baking-soda foam seeped from a crack near the base and puddled on the kitchen counter. If it leaked at school, the table display would be a mess.

Mom said not to add more vinegar yet. Cole dried the model and found the crack along a seam he had glued. He pressed tape over the seam, then spread glue on top of the tape and let it dry. He did not rush the next test.

They tried a small eruption in the sink. The foam came out the top and stayed inside the volcano. Cole smiled. He packed paper towels in the box anyway, but the seam held at the fair.

Fill in the circle next to the best answer.

1. What is wrong with Cole's volcano?

- ☐ A. Mom says he cannot go to the fair.
- ☐ B. The top is sealed so nothing can erupt.
- ☐ C. Foam leaks from a crack before the fair.
- ☐ D. The baking soda is missing from the box.

2. What does Cole do to the seam?

- ☐ A. He tapes it and spreads glue over the tape.
- ☐ B. He makes the crack wider with a pencil.
- ☐ C. He hides the leak with paper towels only.
- ☐ D. He soaks the model in vinegar.

3. How does Cole know the fix worked?

- ☐ A. A test in the sink sends foam out the top.
- ☐ B. The volcano leaks again all over the counter.
- ☐ C. The fair is canceled before he tests it.
- ☐ D. Mom throws the model away.

Name: _____

Date: _____

Ivy's library book was due in the morning, but it was not at her house. She had left it at her friend Nico's after they read together. If she waited until school, the book would be late, and Nico might bring the wrong one.

Ivy called Nico after dinner. He found the book under a couch cushion and read the title so she could be sure. They made a plan. Nico would bring it to the bus stop in the morning, and Ivy would meet him there before the bus came.

Nico was waiting with the book when Ivy arrived. She checked the title, thanked him, and kept it in her hands until she reached the library desk. The book was on time. Next time she would put it in her backpack before she left a friend's house. She told Nico the plan so he would remember too.

Fill in the circle next to the best answer.

1. Where is Ivy's library book?

- ☐ A. At Nico's house, under a couch cushion
- ☐ B. At school, in the lost-and-found bin
- ☐ C. On the library desk, already returned
- ☐ D. In her backpack, ready for the bus

2. How do Ivy and Nico plan to meet?

- ☐ A. Nico will return the book for her.
- ☐ B. They will trade books at lunch the next week.
- ☐ C. Nico will bring the book to the bus stop.
- ☐ D. Ivy will skip school and walk to his house.

3. How does the story end?

- ☐ A. The book stays under Nico's couch.
- ☐ B. Ivy turns in a different book.
- ☐ C. Ivy gets the book and returns it on time.
- ☐ D. They miss the bus and the book is late.

Name: _____ Date: _____

Sam was showing his yo-yo at recess when the string knotted into a hard lump. The yo-yo would not wind, and pulling only made the knot tighter. He almost cut the string with dull scissors from his pencil box. That would have made it too short to use.

His friend handed him a pencil. Sam worked the point into the knot and loosened one loop, then another. He did not yank. When the lump opened, he wound the string slowly around the yo-yo so it would not twist back on itself.

The yo-yo dropped and climbed again. Sam grinned and let his friend try a turn. He wound the string neatly before he put the yo-yo in his pocket. The knot did not come back.

Fill in the circle next to the best answer.

1. What is wrong with Sam's yo-yo?

- ☐ A. The yo-yo rolls into the street.
- ☐ B. The string is knotted and will not wind.
- ☐ C. His friend cuts the string too short.
- ☐ D. The pencil point breaks off in his hand.

2. What does Sam almost do?

- ☐ A. Give the yo-yo away
- ☐ B. Throw the knot in the trash
- ☐ C. Wind the string around his wrist
- ☐ D. Cut the string with dull scissors

3. How does he undo the knot?

- ☐ A. He soaks the knot in water.
- ☐ B. He pulls until the string snaps.
- ☐ C. He asks the teacher to cut the whole string off.
- ☐ D. He loosens it with a pencil, one loop at a time.

Name: _____

Date: _____

Nora kicked the kickball, and it sailed onto the low school roof. It sat against a vent where nobody could reach it. Recess still had time left, and it was the only ball on the field. A student started to look for a way to climb. Nora shook her head.

She found Mr. Shah, the custodian, and pointed to the ball. He brought a long light pole from the closet. Nora stood back while he lifted the ball free. It rolled to the edge, and she caught it in both hands before it could drop on the walk.

They thanked him and went back to the game, kicking lower so the ball would stay in the field. Nora told the next kicker about the roof. The ball stayed on the grass for the rest of recess, and Nora kept her kicks low.

Fill in the circle next to the best answer.

1. What is Nora's problem?

- ☐ A. The class has too many balls.
- ☐ B. Recess ends before the game starts.
- ☐ C. The kickball is stuck on the school roof.
- ☐ D. Mr. Shah needs the pole for another job.

2. Why does Nora stop a student from climbing?

- ☐ A. The roof is not a safe way to get the ball.
- ☐ B. Mr. Shah says the ball can stay up there.
- ☐ C. The vent is on the ground by the field.
- ☐ D. The student already has the ball.

3. How do they get the ball down?

- ☐ A. Mr. Shah frees it with a long pole, and Nora catches it.
- ☐ B. The wind blows it back onto the field.
- ☐ C. They leave it and start a new game with no ball.
- ☐ D. Nora climbs the vent and tosses it down.

Name: _____ Date: _____

Amir's job was to count milk cartons for snack. He counted twenty-two, but the class list had twenty-four names. Two students would have no milk if his count was right, and he did not want to guess. The crate looked full, which made the numbers more confusing.

He asked Priya to count with him. They took the cartons out and made stacks of five. Four stacks made twenty, and four cartons were left over. That was twenty-four. Two cartons had been stuck together, so Amir had skipped them the first time.

He wrote 24 on the snack chart and handed a carton to each student. Nobody was left out. Amir decided he would stack by fives whenever a count did not match the list.

Fill in the circle next to the best answer.

1. What is Amir's problem?

- ☐ A. His milk count is two short of the class list.
- ☐ B. The class list has only twenty names.
- ☐ C. The snack chart already says 24.
- ☐ D. Priya spills the crate of milk.

2. How do Amir and Priya count the second time?

- ☐ A. They erase two names from the class list.
- ☐ B. They hand out milk before they count.
- ☐ C. They make stacks of five and count the extras.
- ☐ D. They guess that two cartons are missing.

3. Why was the first count wrong?

- ☐ A. Priya hid two cartons in her desk.
- ☐ B. Two cartons were stuck together and he skipped them.
- ☐ C. The class had twenty-two students that day.
- ☐ D. The chart told him to stop at twenty.

Name: _____

Date: _____

Lucy had made a bird mask for the class parade. On the morning of the parade, one strap tore loose from the side. The mask slid down her nose when she tried it on. The parade lined up in twenty minutes, and glue would not dry in time.

She took the mask to the art room. Ms. Brooks looked at the tear and handed her a stapler and a spare strip of paper. Lucy folded the strip into a new strap, and Ms. Brooks stapled it where the old one had pulled out. They checked that the staples were flat so they would not scratch.

Lucy tied the new strap and the mask stayed up. She marched with the class, wings held out. After the parade she taped the torn strap into her project notebook so she would remember the fix.

Fill in the circle next to the best answer.

1. What is wrong with Lucy's mask?

- ☐ A. A strap tears and the mask slides down.
- ☐ B. The wings are too heavy to hold.
- ☐ C. The parade is moved to another day.
- ☐ D. Ms. Brooks says masks are not allowed.

2. Why does Lucy not use glue?

- ☐ A. It would not dry before the parade.
- ☐ B. Ms. Brooks wants her to march without a mask.
- ☐ C. The old strap is already dry.
- ☐ D. The art room is out of staples.

3. How is the mask fixed?

- ☐ A. They glue the old strap and wait an hour.
- ☐ B. She borrows a different mask and throws hers away.
- ☐ C. They staple on a new paper strap.
- ☐ D. Lucy holds the mask up with one hand all day.

Name: _____ Date: _____

Felix's group was drawing a map of the school for the new students. When they checked it, the office arrow pointed to the gym. A new student who followed that arrow would walk the wrong way. The group had guessed instead of walking the hall.

Felix got a clipboard and the group walked from the front door. They passed the library, turned left, and found the office at the end of a short hall. Jade counted the doors so they would not mix up the rooms. Felix drew a new arrow and labeled the office in dark letters.

They tested the map with a partner who had not drawn it. She followed the arrow and reached the office. Felix erased the old mark that pointed to the gym. The map was ready for the new students.

Fill in the circle next to the best answer.

1. What is wrong with the school map?

- ☐ A. The office arrow points to the gym.
- ☐ B. The front door is missing from the drawing.
- ☐ C. New students already know every room.
- ☐ D. Jade will not walk the hall.

2. How does the group find the real office?

- ☐ A. They walk the hall and count the doors.
- ☐ B. They copy a map of the gym only.
- ☐ C. They ask a partner to draw it from memory.
- ☐ D. They guess again and point to the library.

3. How do they know the new arrow works?

- ☐ A. The new students redraw it themselves.
- ☐ B. They hide the map in the office.
- ☐ C. A partner follows it and reaches the office.
- ☐ D. Felix leaves the gym arrow on the map.

Name: _____

Date: _____

Mei's science cup of ice was supposed to last until the end of class so she could time how long it took to melt. She had set it in the sunny window. By the middle of the lesson the ice was almost gone, and she had no time written down. The sun, not the clock, had done the work too fast.

She told Mr. Chen. He said she could run the test again if she changed only the place. Mei got a new ice cube, set the cup in the shade on a low shelf, and wrote the start time on her log. She did not add salt or break the cube.

At the end of class a small piece of ice was still there. Mei wrote the end time and subtracted. The shade had made the melt slower, and now she had a real time to share. She labeled the log: sun melts ice faster.

Fill in the circle next to the best answer.

1. What goes wrong with Mei's ice test?

- ☐ A. The shade makes the ice disappear at once.
- ☐ B. Mr. Chen says she cannot use a clock.
- ☐ C. She adds salt before she writes the time.
- ☐ D. The ice melts too fast in the sunny window.

2. What does Mei change the second time?

- ☐ A. She puts the cup back in the window.
- ☐ B. She moves the cup from the sun to the shade.
- ☐ C. She skips writing the start time.
- ☐ D. She breaks the cube into small bits.

3. What does Mei learn from the second test?

- ☐ A. Salt is the only way to time a melt.
- ☐ B. Shade makes the ice melt more slowly.
- ☐ C. The sunny window keeps ice frozen all day.
- ☐ D. Ice will not melt in a classroom.
